

Transitioning to the New Frontier

Webinar: May 8, 15 and 22: 7:30 to 8:30 EST

Open to: Automotive Chief Procurement Officers, and Directors

Overview:

Automotive procurement professionals are navigating uncharted waters brought about by the current economic environment coupled with the lengthy shutdown periods announced by GM and Chrysler.

These events will rapidly and drastically transform the automotive supply base. Procurement leaders will face new and significant issues that will need to be resolved quickly and efficiently to ensure that supply chains support their company's production requirements.

The "New Frontier" webinar is being set up by Advanced Purchasing Dynamics, Inc. to provide automotive procurement executives with a forum to informally share experiences and draw from each others' expertise as we navigate through these extraordinary conditions.

Initially, we will set up three weekly webinars to be conducted May 8, 15 and 22nd from 7:30 to 8:30 am EST. If there is interest we will continue the forum.

The law firm of Borda, Lorenz and Geggie has agreed to help ensure that the forum meets anti-trust guidelines and will provide guidance and answer questions on issues of interest.

Guidelines:

Anti-trust guidelines will be reviewed at every meeting.

Participants must not utilize direct quotes or disseminate any materials presented without the express consent of the speaker or presenter.
